

A policy solution to determine the areas of Islamic lifestyle and its application

Mohammad Ali Dolat¹ Mohammad Javad valizadeh² Ibrahim Shokrani³

Abstract

This article, emphasizing the mission of the Supreme Council of the Cultural Revolution to formulate a comprehensive program of the Islamic-Iranian lifestyle, aims to propose a solution, considering the differences of opinions of experts regarding the examples and areas of the lifestyle, which, firstly, the policy content The transition based on the “comprehensiveness of the lifestyle program” in Iran’s Islamic Jame and Biogeography should be ensured, secondly, from a theoretical point of view, it should have the conditions of being scientific and thirdly, it should create a maximum agreement considering the differences of opinions of experts. For this purpose, minimal and maximal approaches to examples and areas of lifestyle have been identified with the document study method, taking into account the increasing development of the factors and components that make up people’s lifestyles, and to achieve the aforementioned goal, in detail in the group Focal points were discussed. In the discussion about the basis of consensus, it was proposed to determine the theoretical criteria for refining the lifestyle areas, to use the appropriate method and to use management mechanisms, and as a conclusion, the sum of the three proposed strategies was used to identify the lifestyle areas. Therefore, by collecting all the areas desired by the experts, based on four key concepts of lifestyle, i.e. “behavioral patterns”, “personal identity”, “distinction” and “taste”, refinement was done and then the examples and areas obtained, was categorized under more general headings.
